TASK 6B REPORT

SECR1213

SECTION 02

NETWORK COMMUNICATIONS

LECTURER: DR. ISMAIL FAUZI BIN ISNIN

NO	NAME	MATRIC NO
1	YASMIN BATRISYIA BINTI ZAHIRUDIDN	A23CS0201

- **Group name**
CommNet crew

- **Detail your contribution to the group and the project work**
My contribution to this group is I actively engage in all group discussion that we had so that our project can be successfully done by following the rubrics. I also help my team leader to set up every meeting in order for this project to run smoothly. My contribution to the project work was in task 1, I was assigned to design the overall floorplan on the second floor with the description. Then, in task 2 I gathered the necessary requirements and information through research, interviews, and analysis of the lab that I have been assigned to in second floor in order to ensure the development of an efficient and sustainable network plan. For task 3, after gathering all the information needed for the lab and floor, I listed out the devices that need to be add to the lab including the quantity and price, so that our purchase is within our budget. Next, for task 4, is where we plan to distribute and connect the devices accordingly by numbering it and identify cable types and length. For task 5, is where I distribute the network address according for each lab.

- **Detail the other members contribution to the group and the project work**
Mukhriz: He is our group leader. He can delegate the works very well among our groups and I can work with him. During the project, he can handle us very well, and he is very open to the discussion. He is very good at doing his task, and he always led us.
Dania: She helps in listing out the works that we should do for each task so that we don't miss anything from what the instruction is given. She also good at doing her own task.
Adib: He is very supportive in our group, and he do the task that has been given.

- **Explain how you work as a group.**
I'm so open to other people opinions. So, when I finished my task, I would explain to my group members about my task, and I ask about their opinions. And this is where we as a group is very open for discussion. Then, we also divide the workload for each member fairly, so that we as a group feel the ease and burden the same. I also help my other groupmate in doing their task, so that our project can complete within the time given.

- **Explain what you have learned from working as a group.**
I have learned that everyone has their own weaknesses and strength, and we should complete each other. This is because, I believe that if we want to go far, we can work alone but if we want to go further, then we should work in a group.
I also learned that, to work in a group, we should have the empathy attitude towards each other, because everyone has their owns struggle.

- **Explain what you have learned from doing the project.**
I have learned a lot about time management. Because even though that I know how to do the task, but if I don't manage my time well, I would still do the task last minute, and the work quality will be so poor.
Then, I also have learned about how the network distribution is now, and it is not an easy work to do. It has to start with planning, then analysis, then design, then distribute it. Therefore, I appreciate the network so much now.

- **Your comments and suggestions on the project.**

The project has opened my eyes a lot and I really look forward to doing it in the future. I don't really have suggestions for this project because I feel that everything is okay.
